Hi Holly, I'm sorry for the delay in responding. Any chance of holding this call earlier in the day? This might work, but is not ideal. Thanks, David

Hi David,

Looks like we are now aiming for next Monday, June 1 2:30-3:30 eastern. Does that work? If so, I will send an invite.

Thanks!

Holly

Holly, I have not spoken to George P. One call sounds efficient. I could do a call on Tues

or Thurs while working from home (we are in long-term WAH mode while building construction/remodel is completed). My work phone (415-972-3971) rolls directly to my iphone. Thanks, David

Hi David,

Hope all's well. Bruce let me know that George Peridas with NRDC was interested in speaking with EPA about the CA AE issues. Bruce gave him your name and mine, so was wondering if you had spoken to him yet and if not, if you'd want to coordinate with one call. Would be either next week, June 1, or week of June due to UIC managers meeting.

Let me know what you think,

Holly
